

I am against the proposal of LPFM stations, of particular concern is that of the K-LOVE radio station which I have been listening to for more than 3 years now. I believe so strongly in this radio station that I'm also a monthly contributor. K-Love serves my family and I, as well as my local community with a safe listening alternative. It provides positive encouragement not only with the music that is played but announcements of local community events, fellowship opportunities & group charitable activities that otherwise would not be announced or ever known to the greater Chicagoland area and suburbs. I have heard this radio station playing in my Dentist office, as well as retail shops. This somehow helps to bring us all closer together and gives us a sense of belonging to a larger family. The effect on the local community if K-Love were to be displaced by an LPFM broadcaster, would not only be heartbreaking to my family and I but other businesses in the community and throughout the Chicagoland area and suburbs. We have grown to enjoy this positive and refreshing form of broadcasting. Living in the suburbs of Chicago, most residents spend 60% or more of their time commuting in our cars. Listening to K-LOVE lowers our stress levels, helps us to not "sweat the small stuff" and perhaps just might help all of us lower our road rage, so to speak. I believe K-LOVE is of great public interest for all the above reasons stated. Now days, we have so few choices in alternative music and broadcasting that provides such a positive and encouraging message. Now more than ever, we all need something to believe and hope in. K-LOVE provides this message. Please don't displace this station by an LPFM.
